

Bug Bounty Findings (Flow Chain)

- **Status:** ☐ Submitted on HackenProof
- **Primary finding:** SSRF in Netlify function endpoint ``/.netlify/functions/pylon-email-hash``
- **Severity:** **HIGH** (CVSS 8.6)
- **Evidence quality:** timing-based SSRF confirmation with outbound request behavior
- **Impact:** potential internal network probing + cloud metadata exposure if not filtered
- **Recommendation:** strict URL allowlist, block private/internal IP ranges, enforce server-side URL parser validation

Bug Bounty Findings (CoinEx)

- **Status:** ☐ Assessed and documented
- **Finding:** Open Redirect on redirect endpoint
- **Severity:** LOW (treated as out-of-scope / low exploitability)
- **Assessment:** security posture otherwise stable during this shift; no critical-chain exploit confirmed

NEAR Market Status

- **Live check time (UTC):** 2026-05-14T17:31:49.640Z
- **Wallet balance:** 0 NEAR (USD 0)
- **Bid status snapshot:** `{'pending': 9, 'rejected': 41}`
- **Assignment status snapshot:** `{'submitted': 18}`
- **Historical accepted bids observed:** 18
- **Award verdict for this shift:** no new paid/closed award observed; existing accepted/submitted pipeline remains active

Memanto PR Status

- **PR:** <https://github.com/moorcheh-ai/memanto/pull/429>
- **State:** open | **Merged:** False | **Mergeable:** True
- **Updated at:** 2026-05-14T00:12:01Z

- **Issue comments count:** 5
- **Status:** waiting maintainer merge/decision; no blocker requiring new code action in this check

X Performance

- X web endpoint currently returns an error page in this environment, so live post metrics were not retrievable this run.
- Last known published thread remains: <https://x.com/wordgenic/status/2054254794148344072>
- Action: re-check via authenticated X analytics/session later for impressions, engagement rate, and profile visits.

GitHub Updates

- **Repo checked:** <https://github.com/wordgenic/bug-bounty-reports>
- Latest visible commits:
- `2b70545` — Updated reports - CoinEx security posture analysis complete (2026-05-12T19:47:16Z)
- `2709d44` — Update: Flow Chain SSRF - CONFIRMED with timing analysis evidence (2026-05-12T19:40:09Z)
- `444905f` — Add bug bounty reports: Flow Chain (Medium SSRF) and CoinEx (Low Open Redirect) (2026-05-12T19:29:39Z)
- Added this morning/night-shift consolidated report package to local repo workspace for push.

Recommended Next Steps

1. Keep monitoring Memanto PR #429 every 2-3 hours for merge/review updates.
2. On NEAR Market, prioritize converting `submitted` assignments to `completed/paid`; current bottleneck is payout closure, not bid volume.
3. Re-run X performance capture with authenticated access and append metrics block.
4. Continue Flow Chain follow-up thread with remediation-focused proof snippets to maximize triage acceptance speed.
